

Geography and Economy of the Imperial Properties in the Roman World

**Reconstruire la géographie du patrimoine des empereurs romains : édition,
annotation et exploration des données spatiales dans la plateforme PATRIMONIVM**

Alberto DALLA ROSA & Vincent RAZANAJAO

GdR MAGIS – AP humanités numériques spatialisées – 24 juin 2020

European Research Council

Le projet ERC PATRIMONIVM

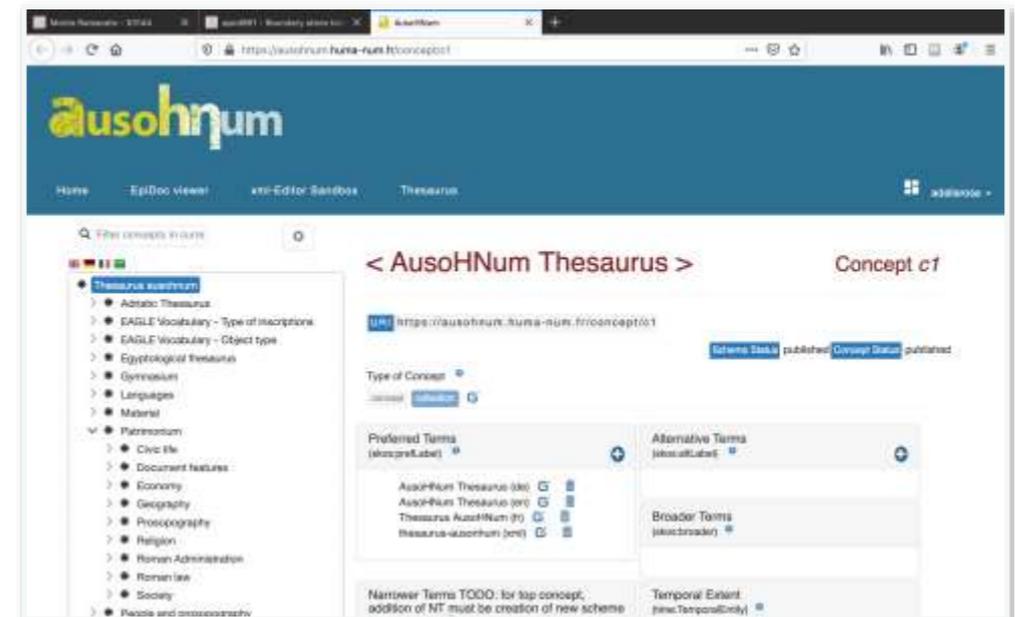

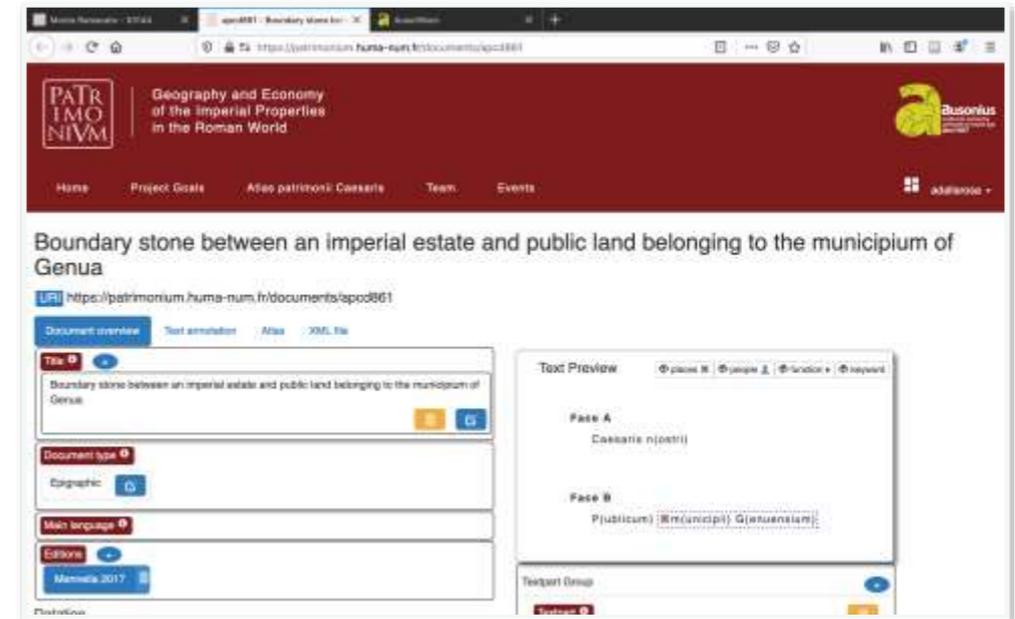

- ▶ Hébergé par l'Université Bordeaux Montaigne, financé par l'ERC pour la période 2017-2022
- ▶ Vise à produire la première étude globale du patrimoine des empereurs romains entre Auguste et Dioclétien
- ▶ Vise à reconstruire :
 - * La distribution géographique
 - * Les schémas de croissance du patrimoine
 - * La valeur économique
 - * L'administration
 - * L'impact socio-économique sur les communautés locales
 - * L'usage politique

Les sources

- ▶ Sources littéraires, épigraphiques, papyrologiques
- ▶ Toute sorte de propriétés (esclaves inclus)
- ▶ Tous les affranchis
- ▶ Toutes les personnes liées au patrimonium (administrateurs, colons, entrepreneurs, etc.)
- ▶ Témoignages

L'Atlas patrimonii Caesaris

- ▶ Trois bases
 - * Textes
 - * Entités géographiques
 - * Personnes
- ▶ Un thésaurus
 - * Terminologie
 - * Fonctions
 - * Mots-clés
- ▶ Bibliographie
 - * Groupe Zotero

Une documentation principalement indirecte

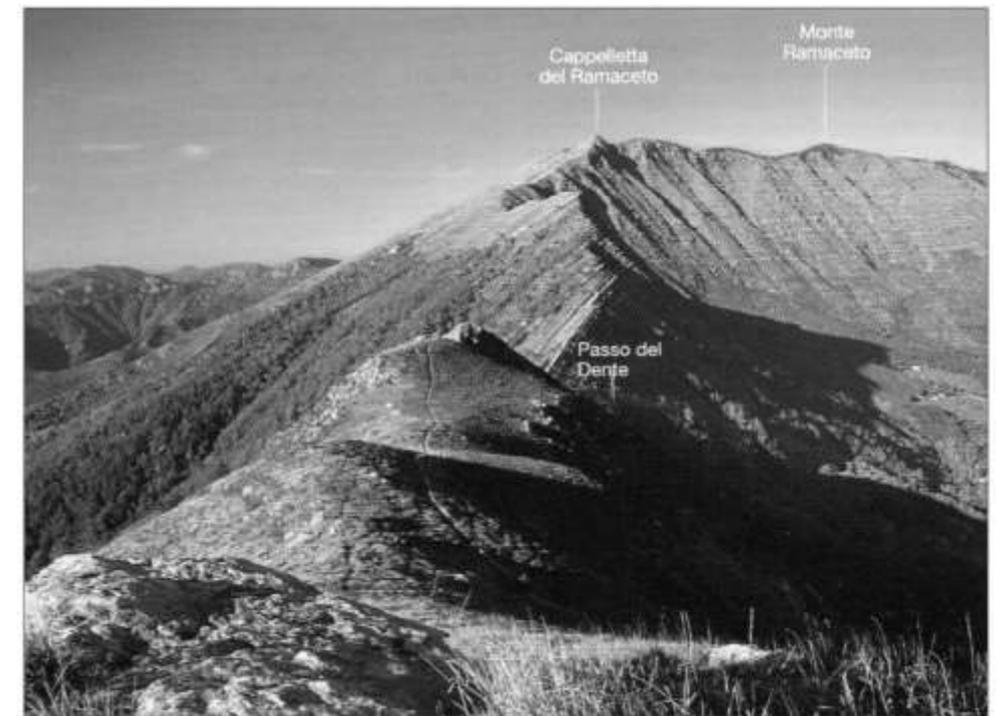

Exemple 1 : la borne de Monte Ramaceto

3. - Il cippo del Monte Ramaceto: lato (a).

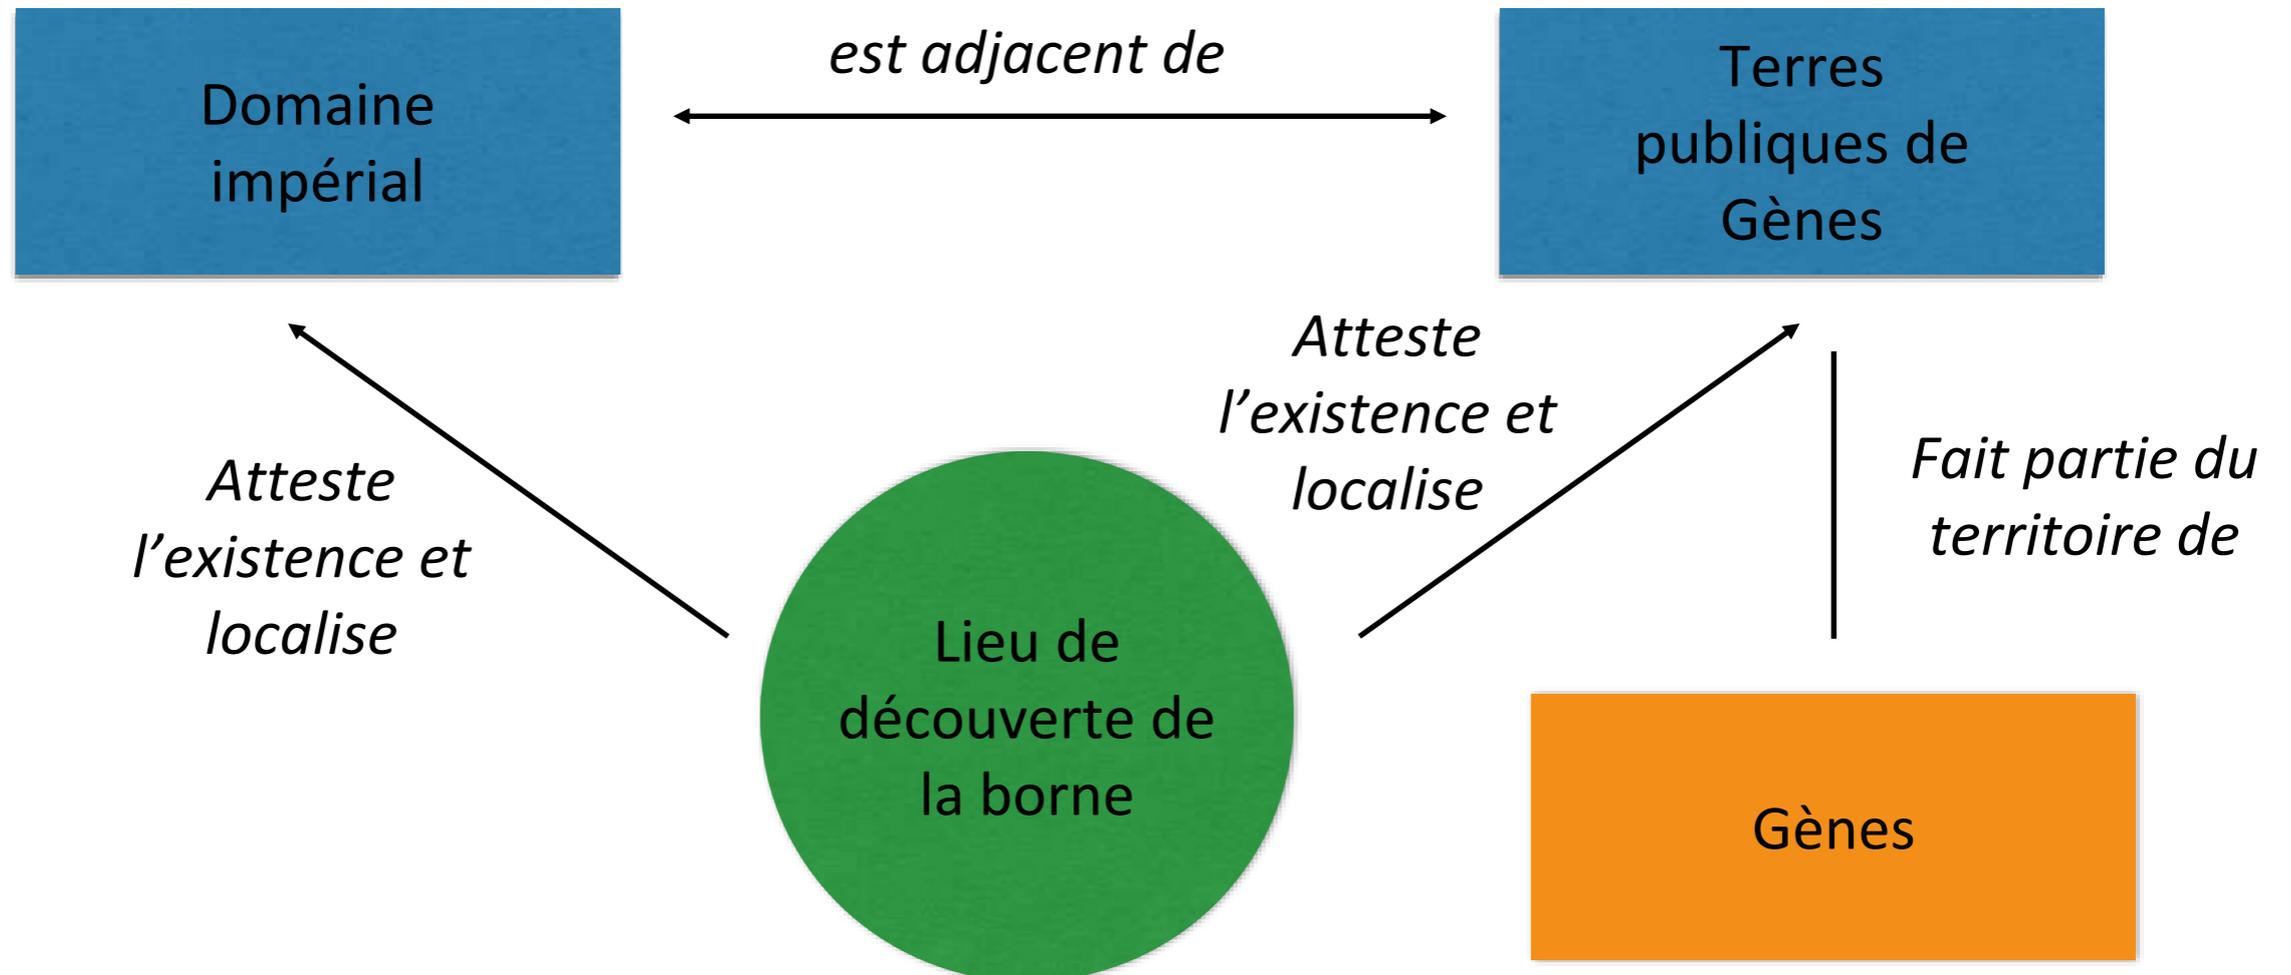

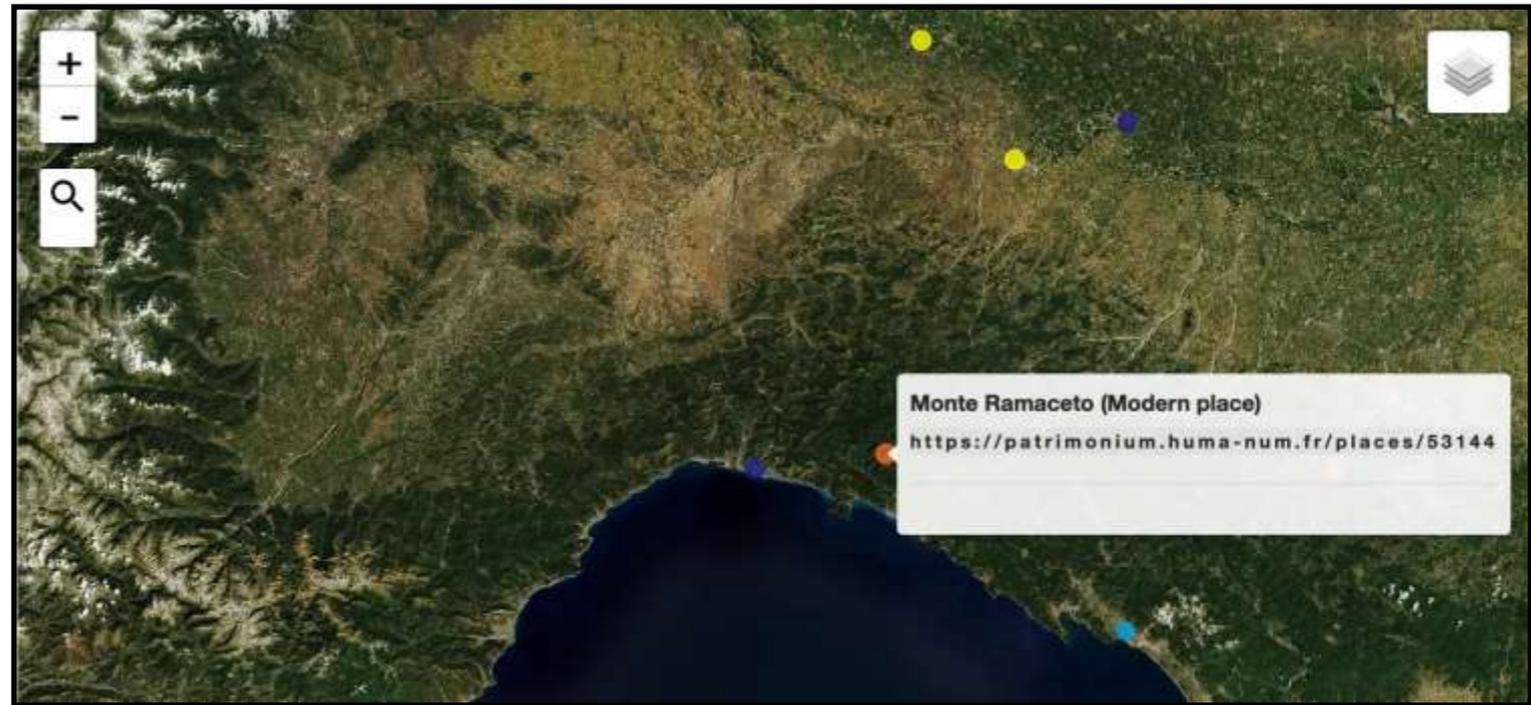

4. - Il cippo del Monte Ramaceto: lato (b).

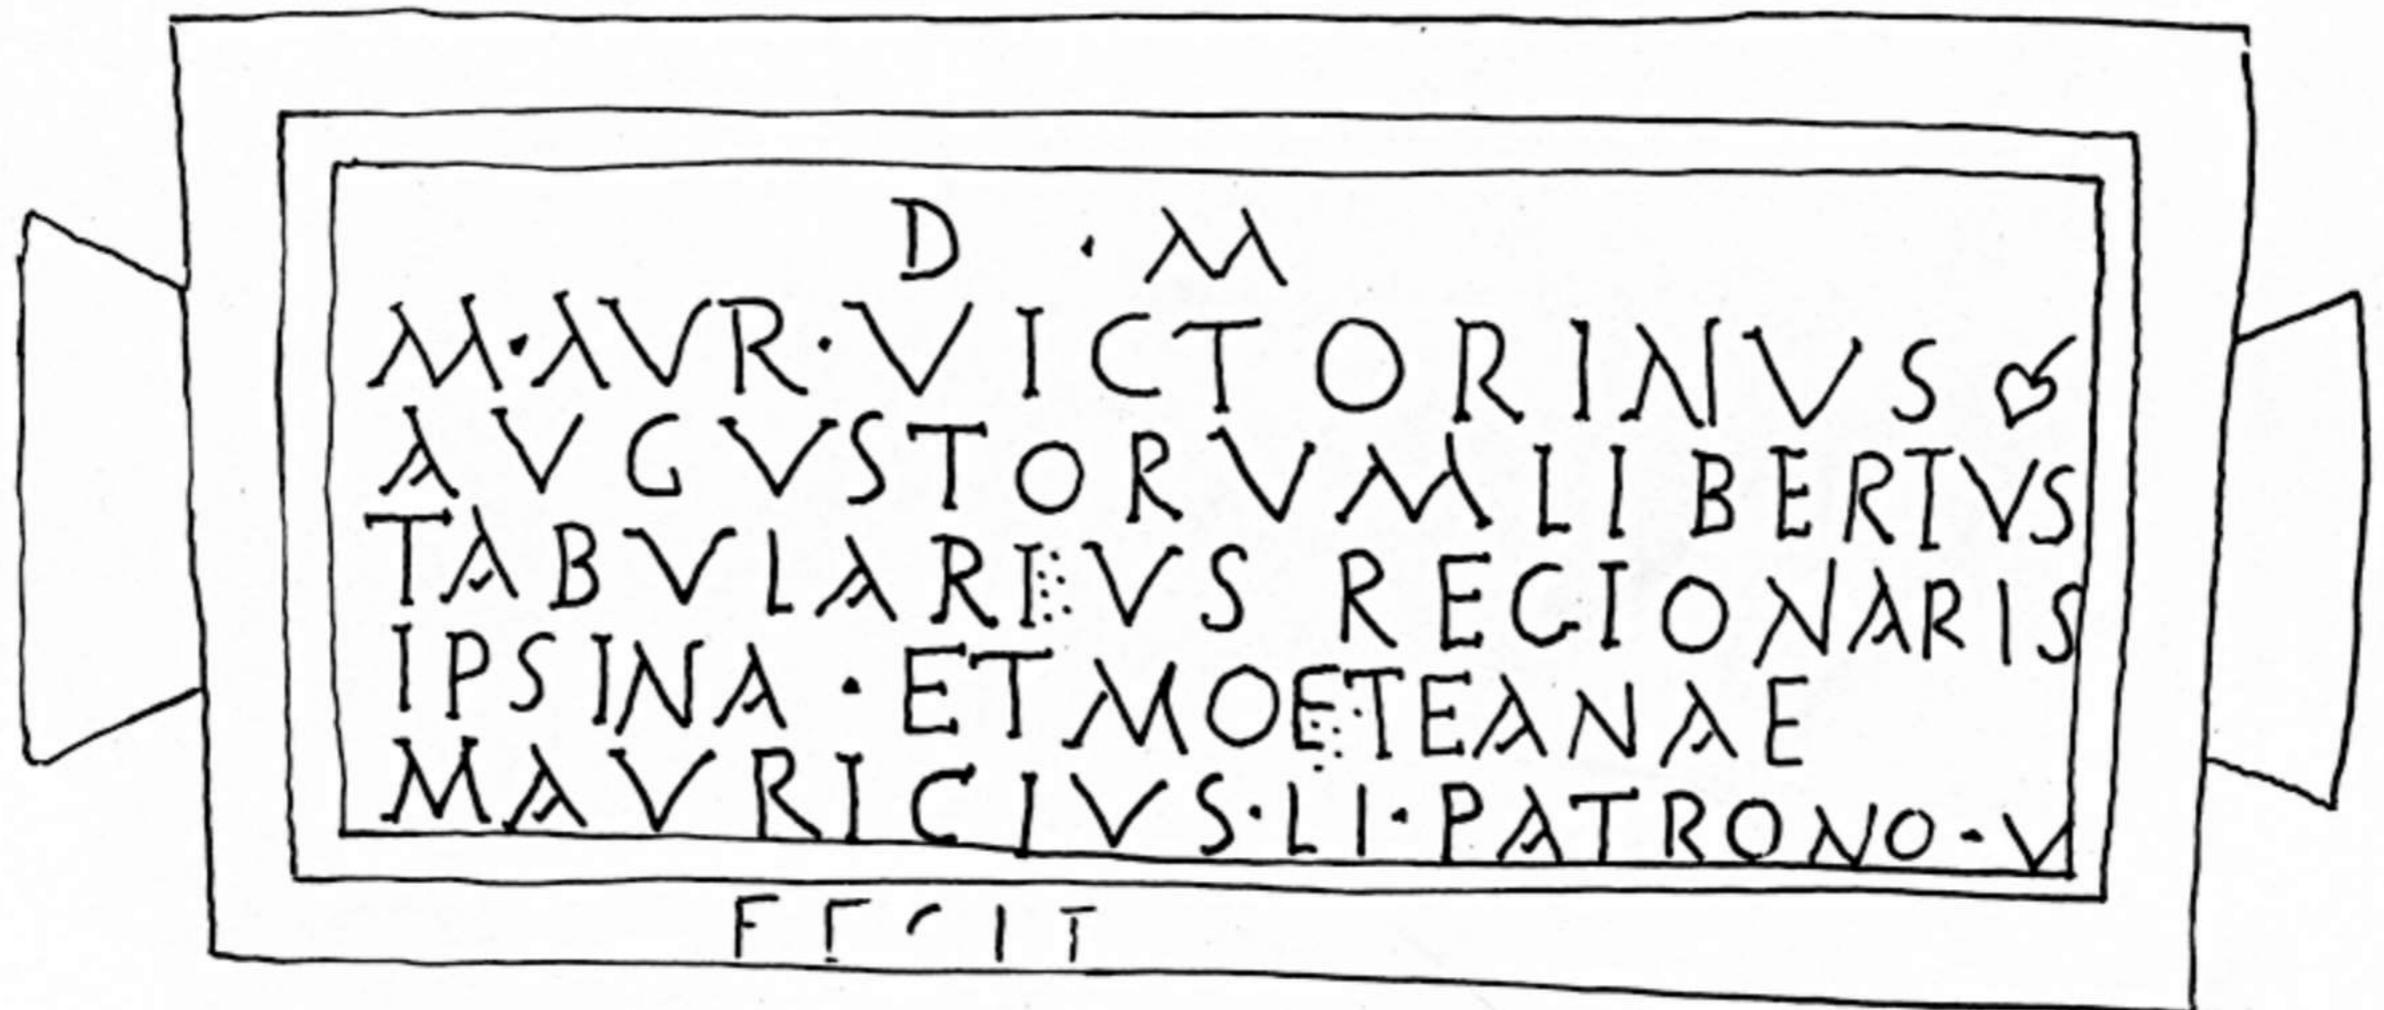

1. - Il monte Ramaceto (Appennino ligure orientale).

- a. Caesaris n(ostri)
- b. p(ublicum) m(unicipi) Genuensium

Une documentation principalement indirecte
Exemple 2 : le sarcophage de M. Aurelius Victorinus

PATRIMONIUM n'est pas un projet épigraphique en soi
mais les sources écrites sont centrales

- ➔ Nécessité d'établir le corpus de sources épigraphiques, papyrologiques et littéraires
- ➔ Création d'une application web:

- Pour rassembler le corpus de textes
 - Proprement encodés (XML/TEI/Epidoc)
 - & enrichis sur le plan sémantique :
 - Données géographiques
 - Données prosopographiques
 - Données historiques et économiques

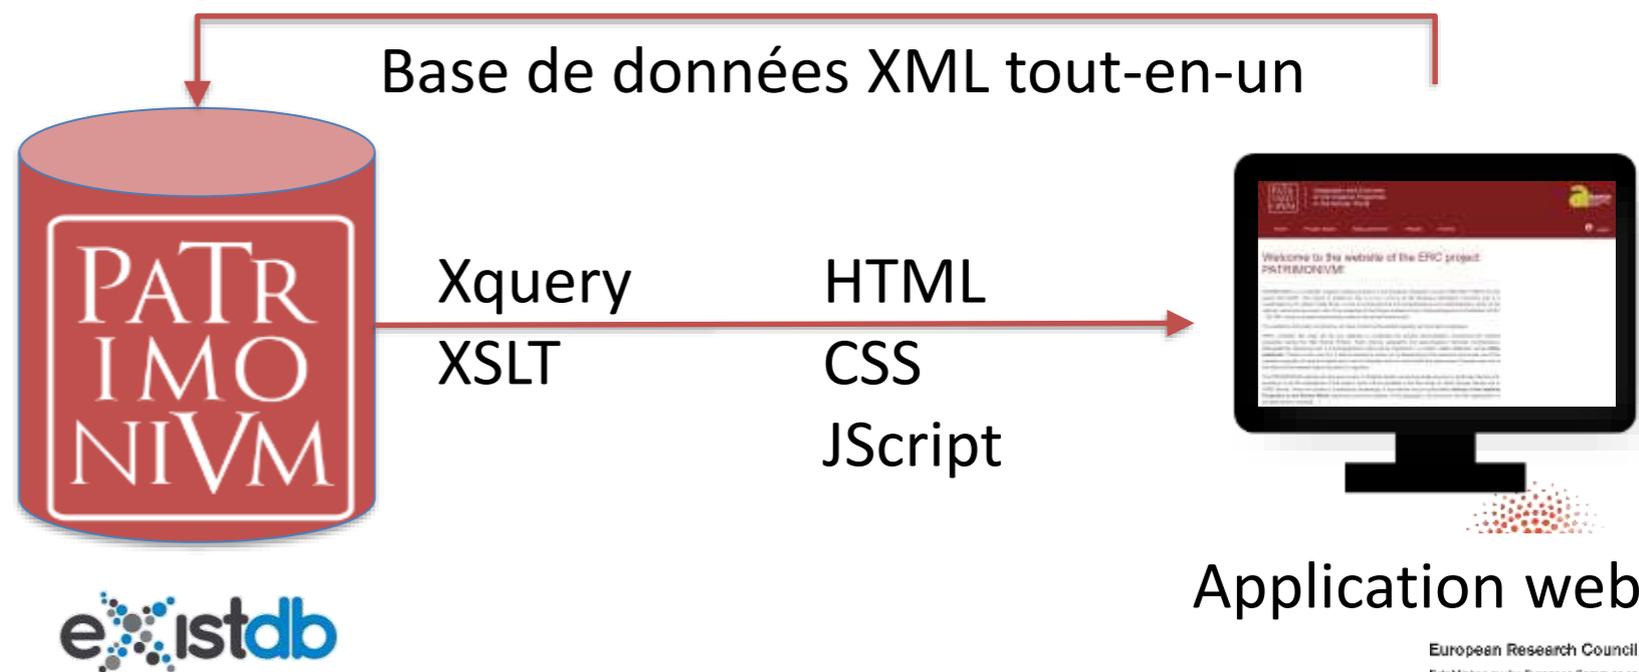

PATRIMONIUM – APPLICATION WEB

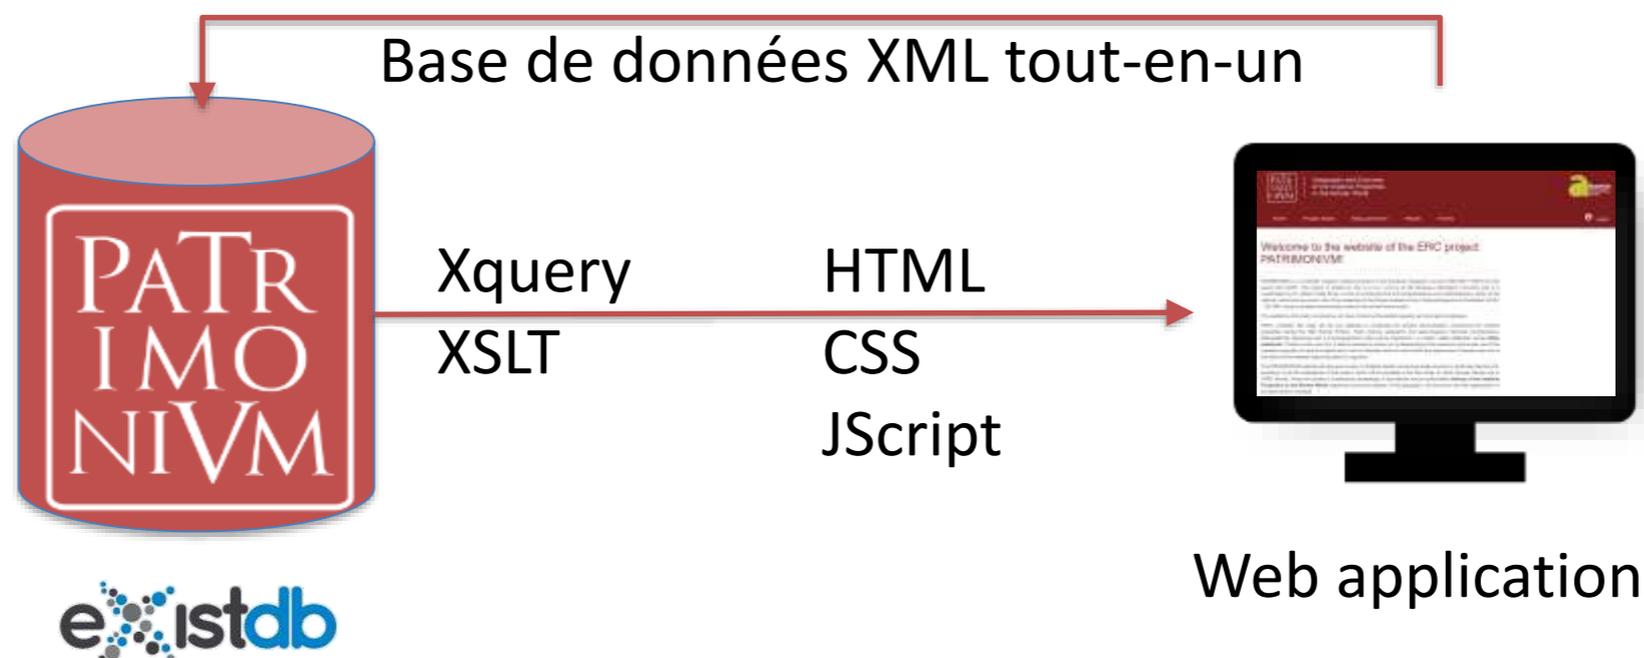

... pour rendre aisé l'encodage XML/TEI des sources

... pour créer et éditer des entités spatiales

... pour créer et éditer les données relatives aux personnes

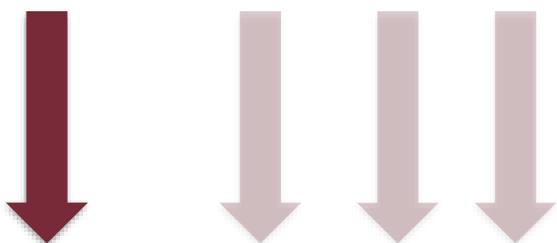

ATLAS PATRIMONII

Toutes les données sont en XML:

- Textes TEI/Epidoc
- Lieux Fichiers XML/RDF sur le modèle de Pleiades
- Personnes " " ad hoc s'inspirant du précédent
- Thesaurus SKOS en XML/RDF (Simple Knowledge Organization System)

Application web – encodage des textes

Les données du fichier XML/TEI sont réparties sur plusieurs onglets et directement éditables (par des champs de saisie, des menus déroulants, des fenêtres modales...)

Map interface showing a satellite view of a region with several blue location pins. A search bar at the top of the map says "Enter a location name".

Ajout d'un lieu dans la base

Si un lieu n'est pas encore présent dans la base, on peut le créer de toute pièce... ou l'importer à partir de Peripleo Pelagios (<https://peripleo.pelagios.org/>)

The screenshot shows the 'Create a new place' form in the background and a modal window in the foreground. The modal window is titled 'Search a place in Pelagios Peripleo' and contains the following elements:

- A search bar with the text 'Bordeaux (http://pleiades.stoa.org/places/138248)'.
- A map of Europe with a red circle highlighting the location of Bordeaux.
- Metadata for 'Bordeaux':
 - 750 BC - 2100
 - pleiades: 138248
 - dare: 147
 - geonames: 3031582
- Description: 'Burdigala (modern Bordeaux) was a Celtic center of the Bituriges Vivisci. The Romans...'. A 'More...' link is present.
- A radio button labeled 'Peripleo by Pelagios Commons'.
- 'Select' and 'Cancel' buttons at the bottom.

The background form includes fields for 'Standardized name (in English)', 'Names' (Latin and Ancient Greek), 'Language', 'Type of place', 'Space type', 'Production type', 'Exact match(es)', and 'Geometry' (Type: Point, Lat., Long., Coordinate).

A dropdown menu for 'Space type' is open, showing the following options:

- Administrative district
- Area
- City
- Ethnic region
- Geographic region
- Military camp/outpost
- Modern place
- Production units (highlighted with a blue arrow)
- Province
- Station
- Village/Settlement
- Estate

A second dropdown menu for 'Production type' is also open, showing the following options:

- Fishery
- Forest
- Landed estate
- Mine
- Processing unit
- Quarry
- Villa
- Workshop

A green 'Create place' button is visible at the bottom of the form.

Les données spatiales

Chaque lieu est enregistré au format XML/RDF sur le modèle Pleiades

Le gazetteer (XML) est généré automatiquement à partir des données primaires:

- Chaque lieu sans coordonnée se voit attribuer les coordonnées du lieu lié, ou la moyenne des coordonnées des lieux liés (spatial:C, spatial:Pi)

Directement sérialisable en geoJson pour être utilisé dans l'interface et Leaflet

Espaces de noms utilisés

Le terme **espace de noms** (*namespace*) désigne en informatique un lieu abstrait conçu pour accueillir des ensembles de termes appartenant à un même répertoire,
